

Adfinis SyGroup is awarded «Best Swiss Red Hat Partner of the year »

Berne, 4. September 2019

Adfinis SyGroup was awarded the „Best Swiss Red Hat Partner of the Year Award“ for years of cooperation at the highest level, innovative projects and unique know-how.

At this year's Red Hat Partner Summit in Prague, the Swiss open source service provider Adfinis SyGroup had reason to celebrate. The numerous successfully completed OpenShift, Ansible and S/4HANA projects of the last two years were awarded the „Best Swiss Red Hat Partner of the Year Award“ by Red Hat.

The award marks another milestone in the joint cooperation after the Premier Partnership. With the release of OpenShift 4, Red Hat and Adfinis customers can look forward to further success stories. You can find out how these projects are implemented and what lessons are learned from the first Swiss OpenShift 4 deployment at the Red Hat Forum 2019 in Zurich-Oerlikon.

Nicolas Christener, CEO of Adfinis SyGroup, knows that hard work pays off: „Together with Red Hat, we have been able to celebrate many successes in recent years. The award motivates our team to continue to deliver excellent performance and we hope to set a good example“.
